LeetCode: 120+ problems • Codeforces: 1002 • CodeChef: 1282

Education

GL Bajaj Institute of Technology and Management

B.Tech in Computer Science and Engineering — CGPA: 8.52

2024 – Present

Greater Noida, UP

KT Public School

Senior Secondary (CBSE) — 92.4%

2023 – 2024

Ayodhya, UP

Technical Skills

Languages: Java, Python, C, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems

Software Engineering: REST APIs, Authentication, Testing, Git, GitHub

AI/ML: Machine Learning, NLP, Computer Vision, Sentence Transformers, Semantic Similarity, YOLOv26

Libraries/Frameworks: NumPy, Pandas, OpenCV, Streamlit, Ultralytics

Tools & Platforms: VS Code, Firebase, ONNX, TFLite

Projects

Autonomous Crop–Weed Segregation & Edge AI System

[GitHub](#)

Python, YOLOv26n, OpenCV, ONNX/TFLite, NumPy

- Engineered a computer-vision pipeline for detecting weeds and protected crops from downward-facing agricultural camera frames using a custom YOLOv26n model.
- Built an edge inference pipeline with 640×640 preprocessing, Non-Maximum Suppression, confidence filtering, spatial localization, and structured JSON detection outputs.
- Implemented a fail-safe decision layer enforcing a 0.70 confidence threshold and crop-overlap gating to prevent low-confidence or unsafe spray decisions.
- Exported and benchmarked PyTorch models to ONNX/TFLite variants, reducing model size from 5.96 MB to approximately 3 MB for constrained edge deployment.
- Developed automated unit tests covering confidence boundaries and class-based safety gates, validating threshold behavior and protected-crop rejection cases.

Sentinel AI – Intelligent Resume Screening Platform

[GitHub](#)

Python, Sentence Transformers, Gemini API, OpenAI API, Firebase

- Built an AI-powered resume screening platform using semantic embeddings and LLM APIs for candidate evaluation beyond keyword-based matching.
- Implemented Firebase Authentication and backend report management for secure user access and persistent report handling.
- Developed an interactive dashboard generating recruiter-oriented candidate reports with PDF and Excel export functionality.

Real-Time Low Voltage Line Fault Detection System

[GitHub](#)

C++, NodeMCU, Embedded Systems, IoT

- Built a real-time AC line fault detection system using NodeMCU and current-sensing hardware to identify line breakages.
- Implemented event detection, alert transmission, and live monitoring for rapid fault identification and system-status tracking.
- Integrated embedded sensing with a monitoring dashboard to provide real-time system-state visualization and fault alerts.

Achievements

- Qualified for the Final Round of Smart India Hackathon (SIH) 2026.
- Winner, Hackathon organized by ITS Engineering College, 2025.
- Solved 120+ Data Structures & Algorithms problems using Java.

Extracurricular

- Smart India Hackathon (SIH) Internal Hackathon – 2025 & 2026
- Zinnovatio Hackathon, Chandigarh University – 2025
- Hackathon, ITS Engineering College – 2025
- Participated in debate, extempore, and public-speaking competitions at school and district level.
